

## Technology Business Analyst

As a Technology Business Analyst, you are working with highly driven colleagues to develop innovative solutions that help our Products clients become 'high-performance' organizations. This includes the development of the digital or IT strategy, as well as the optimization, management and security of the underlying infrastructure, applications and data. Our team serve Products clients in the Consumer Goods & Services, Retail, Travel and Industrial sector who have the ambition to digitalize their businesses, become more Agile, reduce IT cost, simplify their IT-landscape and move to the Cloud adopting value added services/technologies. You will help our clients realize their ambitions in fulfilling roles that are at the intersection between business and IT.

### Your job

The Technology Business Analyst will work in international and multidisciplinary project teams. This means you will get to see many leading organizations in a short time. Each project is a new challenge. You will work with cutting edge technology or you will smartly apply proven technologies. In addition, you will have the knowledge and expertise of our global network at your disposal. We offer you many opportunities to learn, grow and develop both your technology expertise as your leadership qualities. The Technology Business Analyst will work directly with the client in an Accenture team, gathering requirements to analyze, design and/or implement technology best practices supporting business changes. You will contribute to the delivery of our System Integration (SI) and Application Outsourcing (AO) contracts. In doing so you will take pivotal roles in project IT delivery and be part of a team that uses delivery techniques, such as Agile, SAFe and DevOps.

### Your team

Our colleagues in the services-based Technology group help clients, both big and small, by revolutionizing their strategic blueprints for IT transformations. Which cloud platform fits best with client X? How do certain IT-solutions impact the risk analysis of suppliers? How can organizations become more agile and through what process are new applications developed from design thinking workshops? Working closely alongside clients and an international team of professionals, you will develop innovative solutions based on their roadmaps, through mediums such as robotics and artificial intelligence. Throughout the blueprint process you will engage in the development of defense strategies, combining technology and user behavior, to ensure the security of your client. Together we connect the needs of clients with upcoming innovative technologies to prepare them for the future.

## Your background

- Bachelor or Master degree in a relevant field
- 0 - 2 years of working experience
- Fluent in Dutch and English, both word and writing
- A clear affinity with technology, awareness of latest trends in IT and understanding of how to apply IT successfully in complex business environments is preferred
- Understanding of System Integration (SI) and Application Outsourcing (AO) work and how the two differ from each other is not a must but preferred
- Ability to apply and grow technology knowledge and skills in the context of business processes to both SI and AO work
- Team player with strong analytical skills
- You are eager to learn & adopt new technologies

## Our offer

Accenture is an incredible place to work - and keep learning. By joining us, you'll become part of a global company with a world-class brand and reputation. Besides the work we do for our clients, we're really proud of our vibrant, diverse workplace culture: we take an agile approach, provide end-to-end services and maintain a realistic mindset. We want to get to know the real you and help you explore and grow - whatever it is you're great at. So, you will always have lots of learning opportunities (formal and informal) to improve your role-specific skills and expertise. Besides our high-profile, challenging projects and our nurturing work environment, we offer excellent employee benefits, including:

- A flexible transport arrangement that suits your personal situation (electric car or bicycle, flexible budget including NS business card)
- An expense allowance
- Discount on Accenture shares
- The possibility to work 4 x 9 hours a week
